**Clearway Suction Handle**

**Foreign body removal**

- Removes difficult foreign objects from ear and nose
- Ideal for A&E/ER and MIU
- Less traumatic for patient and family
- Can remove the need for ENT surgeon intervention or theatre time

“After 60 minutes of trying to retrieve a small ball bearing from a child’s ear, we decided to use the Clearway Suction Handle which removed it in seconds! We now stock these as a matter of course and have used on many occasions since, with excellent feedback from our ENT surgeons”.

- 2.4mm tip width
- 0.7mm tip width
Bone Trephine

- Used for bone grafting, including taking circular bone graft biopsies for paediatric cleft surgery
- Less invasive
- First time sharpness
- Less patient trauma

T-Handle

- Reusable
- Used to hold Bone Trephine Burr to allow for coring

“I am delighted to be using the trephine with T bar handle for alveolar bone grafting now improved and produced by DTR Medical. It allows a relatively minimal access to harvesting bone from the iliac crest yet with a high bone yield and minimises the external scar. My patients are up and walking the same day after surgery.”

Alistair RM Cobb, Consultant Surgeon, Southwest UK Cleft service

Your Sterile Single-Use ENT Instruments, Without Compromise

**Labelling**

"Supporting visibility, quality and safety in your supply chain***

Our instruments’ packaging features the latest machine readable GS1-standard barcoded labels for product traceability.

The newly incorporated labelling technology is a timely development with an increasing number of health providers worldwide adopting an 'eProcurement' strategy and will provide machine readable product information on all labels to meet expected EU and other regulators demands.

Associated benefits include:

- Improve patient care and reduce costs
- Improve stock control
- One global language
- Accurately track equipment

“Unique device identification (UDI) compliance represents a significant development for our customers. Automation of information flow will have influences across the whole purchasing and supply process, providing the benefits of superior instrument traceability and improved patient safety.”

“We are working closely with Kodit UDI software to provide our labelling solutions to meet the latest international regulations and we serve as a reference site for other manufacturers to learn from.”

Andrew Davidson  
(Managing Director of DTR Medical)
