Matching reusable standards
Save Time - Reprocessing
  ● First time sharpness
  ● Instrument damage/blockage is limited

Suitable for high risk procedures
Save Lives - Contamination
  ● Cross-infection is eliminated
  ● Risk is avoided

Cost effective
Save Money – Increase Productivity
  ● Theatre and clinic time is reduced
  ● Diminished re-processing, repairs and replacement

YOUR STERILE SINGLE-USE SOLUTION

www.dtrmedical.com
Cannula and Biopsy Needles

- Stainless steel cannula with 18g needle for laparoscopic aspiration
- Single-use avoids difficulty to clean cannula and needle with stepped joint
- Extra long 335mm length suitable for patients of all sizes
- Optimum first-time sharpness of needle for ease of use
- Available in 3.5 and 5mm diameter cannulas complete with Luer connection

Cervical Rotating Biopsy Punch Featuring Low Profile Jaw

- Ideal for busy clinics
- Single-use eliminates cross contamination
- Metal jaw ensures a sharp, clean cut
- Rotating head provides easier positioning
- Useful for increased HPV testing demands
- Cost effective with no repair bills

...slick, easy to use and sharp enough to take biopsy without problems*

Burton Hospitals NHS Foundation Trust

Did you know this instrument is renewably sourced?
The handle contains 20% renewable material sourced from technical starch

***CERVICAL ROTATING BIOPSY PUNCH***

CBR1001 Cervical Rotating Biopsy Punch, double packed 10 units

---

**Savings benefits of single-use instruments**

**TIME** = Saves clinic time through effective first time sampling

**LIFE** = Comparable to alternatives; no risk of cross contamination

**COST** = Savings of £2.90 per patient

---

**Annual potential saving up to £7,500**

DTR Medical’s Saving Alternative
- Metal jaw ensures a sharp clean cut
- Rotating head provides easier positioning
- Useful for increased HPV testing

LLETZlearn Training Simulator

- Enables trainees to gain confidence before working on a patient
- Can be used with electro-surgical tools to mimic real life treatment
- Improves skill and eliminates risk to patient in Colposcopy treatment

Tischler Biopsy Punches

- High quality stainless steel instruments for a consistent and precise biopsy
- Sharp first time action to minimise trauma

<table>

LTZ011 LLETZlearn Training Simulator | 1 unit

www.dtrmedical.com
Desjardins Forceps

- Curved shaft for clearer visibility in the cervical os
- Smooth atraumatic edges for increased patient comfort and safety
- Designed to meet specified gynaecology requirements
- Used in endometrial polyp removal

Forcips

- Strong jaws with effective looking ratchet and robust grip

**RAMPLEY SPONGE HOLDER**

### LLETZ Loops and Balls

- Standard shaft fits most electrosurgical pencils
- 150mm ball electrodes suitable for larger patient
- High cutting performance with reduced thermal damage to tissue
- Tungsten loop give ideal tension for greater control
- Single-use ensures no cross infection risks or health & safety hazards

#### BALL ELECTRODES
- ST-99-700 LLETZ Ball Electrode 3mm Ball, 150mm Length 5 units
- ST-99-701 LLETZ Ball Electrode 5mm Ball, 150mm Length 5 units

**Gynaecology Instruments, Without Compromise**

**Endocervical Specula**

- Specula with 265mm reach and 20mm jaws
- Removes the difficulty of cleaning hinge and ratchet
- Scaled ratchet for controlled visibility

**Dental Syringe**

- Suitable for use where needle stick injury is a concern (compliant with EU directive 2010/32/EU – prevention from sharps injuries)
- Popular top loading style to accommodate 2.2ml vials
- Barrel diameter is wide enough to take most vials
- Available in extra long length for use with larger, high BMI patients

**SPECIAL SIZES**

- **KURIHARA ENDOCERVICAL SPECULUM**
  - KSB1001 Kurihara Endocervical Specula black, double packed 10 units
- **SIMS UTERINE SOUND**
  - USH001 Sims Uterine Sound, double packed 20 units

**KOGAN ENDOCERVICAL SPECULUM**

- ECF1001 Kogan Endocervical Specula with ratchet, double packed 10 units

**DENTAL SYRINGE**

- DGSL2001 Dental Syringe Long 115mm for 2.2ml vial, single packed 20 units
- DGSL2001 Dental Syringe Long 115mm for 2.2ml vial, single packed 20 units
Metal Cusco Specula

- Extended range of sizes for all cases
- Strong metal construction with improved insulation performance for patient and user safety
- Insulated and non-insulated options available
- Smooth rounded design for improved patient comfort
- Robust self-retaining screw

---

**Pipette II & IV**

**Endometrial Sampling**

**Savings benefits of single-use instruments**

**TIME** = Saves clinic time through effective first time sampling

**LIFE** = Comparable to alternatives; no risk of cross contamination

**COST** = Savings of £1.48 per patient or 37%

**Annual potential saving up to £3,500**

**Current Treatment**

- The usual procedure to investigate the cause of bleeding in post-menopausal women is endometrial sampling using one of a range of available device options
- Patients are often referred to a hospital gynaecological department
- Many reusable options can be too rigid or suffer from poor or prolonged sampling

**DTR Medical’s Saving Alternative**

- Pipette II & IV suits the current pressures on clinical productivity with four holes in the tip to improve the speed and efficiency of taking the sample. The flexibility of the tube also aids quick insertion
- This relatively new product has the advantage of being 36% less expensive compared to alternatives
- Following successful trials, many departments have switched to the Pipette II & IV and are realising significant cost savings

“Supporting visibility, quality and safety in your supply chain***

Our instruments’ packaging features the latest machine readable GS1-standard barcoded labels for product traceability.

The newly incorporated labelling technology is a timely development with an increasing number of health providers worldwide adopting an ‘eProcurement’ strategy and will provide machine readable product information on all labels to meet expected EU and other regulators’ demands.

**Associated benefits include:**
- Improve patient care and reduce costs
- Improve stock control
- One global language
- Accurately track equipment

“Unique device identification (UDI) compliance represents a significant development for our customers. Automation of information flow will have an influence across the whole purchasing and supply process, providing the benefits of superior instrument traceability and improved patient safety.”

“We are working closely with Kodit UDI software to provide our labelling solutions to meet the latest international regulations and we serve as a reference site for other manufacturers to learn from.”

Andrew Davidson
(Managing Director of DTR Medical)

For more information on our new product labelling, please contact Customer Services on +44 (0) 1792 797910 or info@dtrmedical.com

*** - GS1 – Global Traceability Standards

Matching reusable standards

We benchmark against reusable British and international standards:

**BS 5194-1:1991**
(Inc ISO 7153 – 1:2001) Surgical Instruments - (Metallic Materials and Stainless Steel)

**BS 5194-2:1989**
Specification for Instruments with Pivot Joints

**BS 5194-3:1985**
Specification for Dissecting Forceps

**BS 5194-4:1985**
Specification for Scissors, Shears and other Jointed Instruments

We operate our own UK production facilities equipped with ISO class 7 cleanrooms.

Our company is fully accredited to:

- **EN ISO 9001:2008**
- **EN ISO 13485:2012**
- **MDD 93/42/EEC**
