

Buy Cheap, Buy Twice! Having to Open Several Packs Due to Poor Quality? Try ours, Designed to Make a Difference

The Design Checklist

- ✓ High-quality instruments such as Single-use Scissors, Hooks & Needle Holders are readily available as individual items
- ✓ Single-use precision instruments save time, ensure better outcomes and keep clinics running smoothly versus opening several packs to find a suitable and effective instrument
- ✓ Quality inspected instruments with first time sharpness every time versus opening several reusable packs to find one reusable instrument which has been blunted from repeated use
- ✓ Individual items eliminate wastage from un-used instruments in Single-use packs
- ✓ Relieve the pressure on staffing levels and capacity in Hospital Sterilization and Disinfection Units (HSDU) through the use of Single-use instruments

Iris Scissors

- ✓ 100% quality inspected
- ✓ First time sharpness every time, in comparison to cheap Single-use alternatives found in trays that don't cut meaning several packs are opened to find one suitable Scissors

Gillies Skin Hook

- ✓ Skin Hooks found in re-usable Trays risk fine tips being blunted through repeated sterilisation, Single-use Gillies are always sharp and ensure a precise retraction

Vannas Scissors

- ✓ Guaranteed sharp/sharp edges allow the precision you require in delicate procedures

Clinical Value – Save Time, Lives & Costs by Eliminating the Unnecessary Opening of Packs to Find Suitable Instruments

TIME

Put your time to better use and try our range of Sterile Single-use instruments that work first time, every time

LIFE

Patient experience improved when high-quality Single-use instruments are used. Our Scissors provide a sharper cut preventing tissue tearing and allow for quicker wound healing and a more comfortable, less traumatic procedure and experience

COST

Removes the issue of wasting surgical packs and trays to find suitable instruments which work

Opening several Children's Trays in order to find the right size that cost £12.33¹ to sterilise, in comparison our Single-use Ear Specula which cost less than £2

No shortage of instruments whilst undergoing repair

Clinicians' Experiences

Don't just take our word for it ...

"I haven't been able to previously find any good Single-Use Scissors, however I have just used one of the Scissors you gave me and they are perfect."

Department Feedback, Guy's Hospital

"The experience of reusable Instruments not coming back from HSDU, makes sense to Single-use instruments."

Mani Thaigarajan, Consultant Ophthalmologist, Princess Royal University Hospital
