Labelling

“Supporting visibility, quality and safety in your supply chain”**

Our instruments’ packaging features the latest machine readable GS1-standard barcoded labels for product traceability.

The newly incorporated labelling technology is a timely development with an increasing number of health providers worldwide adopting an ‘eProcurement’ strategy and will provide machine readable product information on all labels to meet expected EU and other regulators’ demands.

Associated benefits include:
- Improve patient care and reduce costs
- Improve stock control
- One global language
- Accurately track equipment

“Unique device identification (UDI) compliance represents a significant development for our customers. Automation of information flow will have influences across the whole purchasing and supply process, providing the benefits of superior instrument traceability and improved patient safety.”

“We are working closely with Kodit UDI software to provide our labelling solutions to meet the latest international regulations and we serve as a reference site for other manufacturers to learn from.”

Andrew Davidson
(Managing Director of DTR Medical)

Matching reusable standards
We benchmark against reusable British and international standards:

BS 5194-2:1989
Specification for Instruments with Pivot Joints

BS 5194-3:1985
Specification for Dissecting Forceps

BS 5194-4:1985
Specification for Scissors, Shears and other Jointed Instruments

We operate our own UK production facilities equipped with ISO class 7 cleanrooms
